## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7, 10-14, and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Held.

Held discloses a rotary edging wheel comprising: a hub portion (not numbered but shown in figure 1), a cutting surface (16), a planar side portion (18), a swarf clearing groove (12f), and a circumferential groove (22).

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3723

4. Claims 8, 9, 15, 16, and 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Held.

Held discloses as discussed above.

Held does not disclose the specific attachment means, size, and hardness of the abrasive grit.

The specific attachment means, size, and hardness of the abrasive grit would have been obvious to one having ordinary skill in the art at the time the invention was made, since it is within the general skill of a worker in the art to select size, hardness, and means for attachment on the basis of their suitability for the user's preference as a matter of obvious design choice.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
